

## 316 Stainless Steel Thru-Hull Fittings with Barb for Hose

Find a huge selection of 316 Stainless Steel Thru-Hull Fittings with Barb for Hose from China at POWER MARINE. We have been specialized in marine hardware for more than 25 years. Our product is made of 316 stainless steel, which has good corrosion resistance. We can provide high quality products and competitive prices, and we look forward to becoming your long-term partner in China. Welcome to contact us.

## 316 Stainless Steel Thru-Hull Fittings with Barb for Hose

### Product Introduction

As the professional manufacturer, POWER MARINE would like to provide you 316 Stainless Steel Thru-Hull Fittings with Barb for Hose. And we will offer you the best after-sale service and timely delivery. We follow the quality of rest assured that the price of conscience, dedicated service. 316 Stainless Steel Thru-Hull Fittings with Barb for Hose has a longer service life in seawater, ultraviolet light and humid environments. We can provide high quality products and competitive prices, and we look forward to becoming your long-term partner in China. Welcome to contact us.

### Product Parameter (Specification)

Product name	316 Stainless Steel Thru-Hull Fittings with Barb for Hose
Specification available	Multiple sizes
Standards that follow to	ISO 9001, CE, TUV, CSS, SGS.
Samples available	Yes.

### Shandong Power Industry and Trade Co., Ltd.

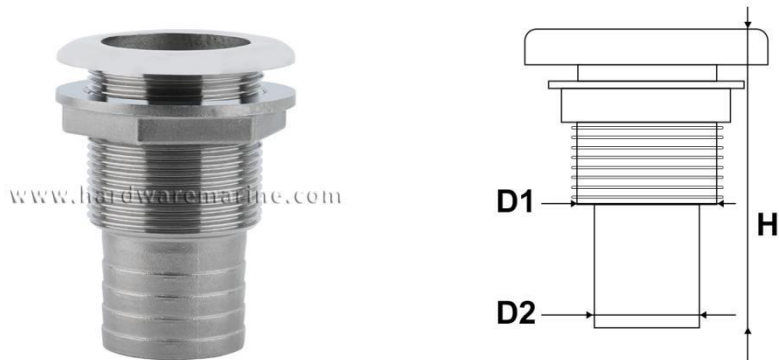

Address: Chengyang District, Qingdao, Shandong Province, China

Tel: [+86-15865772126](tel:+86-15865772126)

PM1106B	48	39.5	1-1/2inch
PM1107B	59.5	52	2inch

### Product Feature And Application

The history of 316 Stainless Steel Thru-Hull Fittings with Barb for Hose can be traced back to the development of metal piping and marine systems. In the early days of shipbuilding, wooden ships relied on wooden pipes and fittings for water circulation and drainage. However, as technology advances and metal processing techniques improve, stainless steel accessories have

become more common. Known for its resistance to corrosion and ability to withstand harsh marine environments, stainless steel has quickly become the material of choice for through-hull fittings. These fittings are used to provide a watertight seal where hoses pass through the hull, such as pipes, bilge pumps or raw water inlets. The added barbs on the fitting allow for a secure connection with the hose, preventing leaks and ensuring efficient water flow. The barbs grip the hose tightly, preventing it from slipping off the connector and creating a secure connection. Over time, the design and functionality of 316 Stainless Steel Thru-Hull Fittings with Barb for Hose have evolved to meet the needs of modern boat owners. Manufacturers now offer a variety of sizes, configurations, and finishes to suit different applications and aesthetic needs. Today, 316 Stainless Steel Thru-Hull Fittings with Barb for Hose are widely used in the marine industry to provide durability, longevity and reliability to water circulation and drainage systems on ships of all sizes.

## Product Details

Some common features of 316 Stainless Steel Thru-Hull Fittings with Barb for Hose are:

**Material:** These accessories are typically made from high-quality stainless steel, providing excellent corrosion resistance and durability in marine environments.

**Barb Design:** The coupling has barbs or ridges along the stem to securely grip the hose and prevent it from slipping. Barbs ensure a tight and reliable connection.

**Hose Compatibility:** 316 Stainless Steel Thru-Hull Fittings with Barb for Hose are available in different sizes to accommodate a variety of hose diameters. It is important to choose the correct size that matches the inside diameter of the hose you are using.

**Threaded Design:** 316 Stainless Steel Thru-Hull Fittings with Barb for Hose feature external threads for easy installation through the hull. These threads ensure a tight and watertight fit to the hull while providing a means of attaching a nut or other fastening mechanism.

**Flange or Base:** These fittings usually have a flange or base that is flush with the hull. The flange provides a larger surface area for better load distribution

and increases the overall stability of the fitting.

**Drainage Capability:** Some through-hull fittings may feature built-in drain plugs to easily drain water from boat systems, such as bilge or livewell applications.

**Finish:** 316 Stainless Steel Thru-Hull Fittings with Barb for Hose often come in a variety of finishes, such as polished or brushed, to suit the boat owner's aesthetic preferences. Proper installation and maintenance of through-hull fittings must be ensured to maximize their performance and prevent any potential leakage or water intrusion issues.

### **Loading & Shipment**

Thanks to superior quality, we have been establishing a close & long business partner relationship with the customers from more than 30 countries, and we've gotten so many positive feedback regarding the quality.
